URGENT MEDICAL SUPPORT APPEAL

Saving 10-Year-Old Nidhi Jhariya in Her Brave Battle Against Ewing's Sarcoma

CASE OVERVIEW & EMERGENCY STATUS

Ms. Nidhi Jhariya is a vibrant 10-year-old girl who has been diagnosed with Humerus Ewing's Sarcoma—a highly malignant childhood bone cancer. She has resiliently endured 5 cycles of aggressive chemotherapy at Kokilaben Dhirubhai Ambani Hospital, Mumbai. To survive, she urgently requires 1 final pre-operative cycle of chemotherapy, followed by a highly complex radical tumor resection surgery, structural bone reconstruction, and specialized internal oncology implants. This life-saving intervention must be succeeded by another 5 to 6 months of post-operative consolidation chemotherapy. Her family is completely exhausted financially, and Kalyanam has stepped forward to manage this emergency crowd funding appeal.

1. PATIENT MEDICAL PROFILE

- **Patient Name:** Ms. Nidhi Jhariya
- **Age / Gender:** 10 Years / Female
- **Hospital UHID:** KH1001078652
- **Primary Diagnosis:** Left Humerus Ewing's Sarcoma (Malignant Bone Tumour)
- **Treating Institution:** Kokilaben Dhirubhai Ambani Hospital & Medical Research Institute, Mumbai, India
- **Primary Consultants:** Dr. Santanu Sen (Pediatric Hemato-Oncology) & Dr. Manit K. Gundavda (Orthopaedic Oncology)
- **Clinical Intent:** CURATIVE (The medical team notes a 'Good' long-term prognosis provided treatment is uninterrupted)

2. PATIENT PROFILE & SOCIO-ECONOMIC BACKGROUND

- Father’s Occupation: Daily-wage laborer (Sole earning member, struggling with highly irregular income)
- Mother’s Occupation: Homemaker
- Family Structure: A humble family with three young daughters:
- 1. Eldest Daughter: 13 years old
- 2. Second Daughter (The Patient, Nidhi): 9 years old (Grade 5 student at a local government school)
- 3. Youngest Daughter: 7 years old
- Current Financial Status: The family lives below the poverty line. Having completely exhausted their meager resources on diagnostic tests and initial travel, they are financially stranded in Mumbai.

3. CERTIFIED ESTIMATE OF MEDICAL EXPENDITURE

The clinical board and orthopaedic oncology division have furnished a formal cost structure for the surgery, reconstruction framework, and mandatory inpatient logistics. The total estimated funding goal is structured between Rs. 10,00,000 and Rs. 15,00,000.

Expenditure Classification	Certified Cost (INR)	Clinical Purpose / Deliverable
Tumor Resection Surgery	**Rs. 5,00,000**	Radical surgical removal of malignant mass from left humerus bone.
Structural Bone Reconstruction	**Rs. 3,50,000**	Complex structural reconstruction of the arm skeletal framework.

Specialized Oncology Implant	**Rs. 3,50,000**	High-grade internal prosthetic hardware to preserve arm/limb function.
Extended Hospital Stay & ICU	**Rs. 2,00,000**	Vital post-operative critical care monitoring, recovery, and diagnostics.
Pre & Post-Op Chemotherapy	**Rs. 3,00,000 -**	Urgent pre-op cycles and 5-6 months of post-op consolidation therapy.

4. SECURE DONATION ROUTING & VERIFICATION

Kalyanam ensures that 100% of these allocated proceeds are mapped directly to Nidhi's patient registry.

Primary Cheque / DD Payee Name/AC transfer	**KALYANAM**
Patient Registration Reference	**Ms. Nidhi Jhariya (UHID: KH1001078652)**
BANK	**IDBI**
Account no	**0110102000034830**
IFSC	**IBKL0000110**

Kalyanam Foundation makes a humble and urgent appeal to corporate CSR boards, individual philanthropists, and compassionate citizens. A contribution of any size helps close the gap between a critical cancer diagnosis and a definitive cure for young Nidhi. Thank you for your profound kindness, empathy, and swift intervention.
